Hmm . . . unless my head has been in the sand, I have seen it in other contracts. I know that it was always in contracts in my previous life.

Gwen,

Since when did that language become standard??? Perhaps A&P incorporated it as standard in their templates but it was never in the RD&E contracts prior to 2002 and I do not recall any conversations with Risk Management where they requested it be included.

Hi Amy! Embedded in the attached DRAFT are collective comments from the PT and Valerie. Please have A&P make the changes the re-circulate to the

3/7/2005

PM3006536366

team for a final review before sending to Plowshare.

Scott: You had requested that we attached Expense Guidelines for Independent Contractors for MET Labs. Please help me better understand why and provide those guidelines. The only expense guidelines we have are for travel.

Bristow: You had requested that we delete language in Section 8 regarding "issued by insurers acceptable to PM". This is standard language, but I agree that it is a stretch to require it of subcontractors. I deleted it there, but left it in the first sentence. If Plowshares has issues with this, we have negotiated this out before.
